

# Xinying Zhou

(86) 186-7620-3492 · [chloez0607@gmail.com](mailto:chloez0607@gmail.com) · [Portfolio](#)

## Summary

Front-end developer with over 2 years of experience in large-scale projects, including full application development and front-end design and implementation for multiple Salesforce systems.

- Proficient in HTML5, CSS3, JavaScript, TypeScript, React, and RESTful APIs, with a strong ability to develop and maintain complex front-end functionalities.
- Expert in modular, component-based, and engineering practices, ensuring maintainability and scalability of projects.
- Experienced in Salesforce CRM, creating customized front-end interfaces to enhance user interactions.
- Skilled in using CI/CD tools (Azure DevOps) to streamline automation deployment processes, improving development and release efficiency.
- Familiar with Agile methodologies, actively contributing to Sprint planning and project optimization to enhance team productivity.
- Exceptional communication and problem-solving skills, effectively coordinating with cross-functional teams to drive project success.
- Fluent in English for international project communication and documentation.

## Skills

Languages: JavaScript, TypeScript

Web tech: HTML5, CSS3, Responsive Web, Accessibility

Front end: RESTful API, React, React Native, Lightning Web Components (LWC)

Tools:                Git, Azure DevOps, Salesforce DX, Postman, Jira, Figma

## Professional Experience

### CareerBuilder Shanghai - *Software Engineer II*

Shanghai, China | 2024.09 - Present

- Contributed to the **maintenance** and **bug-fixing** of the existing mobile app, ensuring continued functionality for users.
- Joined the **initiative team** delivering a **new, upgraded mobile app** for iOS and Android, focusing on enhanced user experience and functionality.
- Set up **ESLint** and **Prettier** with **TypeScript** and implemented **Husky hooks** for automated linting, establishing consistent **code quality standards**.
- Collaborated on defining **coding standards**, naming conventions, and project structure, documenting these decisions in the **README** for team alignment.
- Actively participated in **Sprint and project planning**, helping estimate feature delivery for the **MVP version** and developing a plan to address project constraints.
- Worked with the team leader to adopt **Zustand for state management** and quickly adapted to new tools like **Swagger** and **SWR** for API integration and data fetching.

### PwC Acceleration Centre Shanghai - *Software Development Engineer*

Shanghai, China | 2021.08 - 2024.04

- Led front-end development using HTML5, CSS3, JavaScript, React, React Native, and Lightning Web Components (LWC) for both web and mobile applications.

- Designed and implemented user-friendly interfaces for web and mobile applications, optimizing page performance and enhancing user experience.
- Integrated RESTful APIs to extend application functionality, ensuring smooth data integration and optimizing responsive design and cross-browser compatibility.
- Collaborated closely with cross-functional teams including project managers, product owners, designers, back-end developers, and QA engineers to deliver high-quality solutions.
- Participated in Scrum meetings and calls with clients to ensure successful implementation and delivery of Salesforce solutions.
- Conducted unit testing and code reviews to ensure code quality, maintainability, and high performance.
- Addressed front-end development challenges to improve product stability and user satisfaction.
- Notable project: My CHOC, a mobile application for pediatric patients, showcasing technical expertise and problem-solving skills.

## Project Experience

### My CHOC

PwC Acceleration Centre Shanghai | 2023.01 - 2024.04

**Overview:** A mobile application designed to streamline and enhance the medical experience for pediatric patients in children's hospitals.

**Tech Stack:** React Native, JavaScript, RESTful APIs, Redux, Redux-Saga, GraphQL, Axios, i18next

#### Responsibilities:

- Developed mobile applications for iOS and Android platforms using React Native and JavaScript.
- Implemented Axios and RESTful APIs for seamless integration with Cerner and Salesforce systems.

- Utilized Redux and Redux-Saga for state management, optimizing app performance.
- Managed application internationalization, supporting multiple languages including English and Spanish.
- Modified UI design to ensure a user-friendly and consistent experience.
- Implemented patient-switching functionality using Redux to manage account and patient data.
- Customized the My Health section to display medical record categories based on selected patients.

**Achievements:**

- Successfully released the app in beta on the App Store and Play Store, with over 300 downloads.
- Received a 5-star rating on the App Store as of August 2023.
- [Download on the App Store](#)

**PwC Employee Portal**

PwC Acceleration Centre Shanghai | 2022.08 - 2022.12

**Overview:** Designed and developed an employee portal using Experience Cloud with LWR technology.

**Tech Stack:** Experience Cloud, LWR, Apex, Salesforce

**Responsibilities:**

- Assisted in designing data models and implementing objects, fields, and page layouts.
- Developed portal features including navigation, filtering, search, and detailed pages.
- Contributed to Apex code development for portal logic and conducted unit testing to ensure over 90% code coverage.
- Managed CI/CD processes to ensure smooth integration and delivery of the project.
- Implemented single sign-on (SSO) functionality for the portal.

- Participated in all project phases, from design to implementation.

**Achievements:**

- Successfully released the beta version of the portal in December 2022.

**Supplier Management System Migration**

PwC Acceleration Centre Shanghai | 2022.04 - 2022.08

**Overview:** Migrated the supplier management system from Aura framework to Lightning Web Components (LWC) on Experience Cloud to enhance performance and user experience.

**Tech Stack:** Aura, Lightning Web Components (LWC), Experience Cloud

**Responsibilities:**

- Migrated all Aura functionalities to LWC while maintaining functionality and performance standards.
- Implemented features such as RFP, purchase orders, cases, and common components with a focus on quality and efficiency.
- Collaborated with the testing team to ensure a seamless migration and minimal impact on end-users, addressing issues promptly.
- Implemented single sign-on (SSO) functionality for the portal.
- Participated in all project phases, from design to implementation.

**Achievements:**

- Significantly improved user experience for suppliers and procurement teams, streamlining business processes.

**Internal Workflow UI Implementation for a Multinational Food, Snack, and Beverage Company**

PwC Acceleration Centre Shanghai | 2021.08 - 2022.04

**Overview:** Led the implementation of internal employee workflow UI using Lightning Web Components (LWC) to optimize processes and enhance user experience for a multinational food, snack, and beverage company.

**Tech Stack:** Lightning Web Components (LWC), Salesforce

**Responsibilities:**

- Designed and implemented UI for internal employee workflows using LWC, improving process efficiency and user experience.
- Collaborated with the testing team to resolve errors and performance issues quickly, ensuring a smooth transition to Salesforce mobile applications.
- Held daily Scrum meetings with client representatives to gather requirements, analyze feedback, and provide recommendations for improvements.

**Achievements:**

- Delivered the solution within a tight deadline, significantly enhancing workflows and experiences for over 1,000 employees across different countries.

## Personal Projects

### Game Hub

- **Overview:** A web application for searching and filtering video games.
- **Tech Stack:** React, TypeScript, React Query, React Router
